FIRST AMENDED COMPLAINT FOR PATENT INFRINGEMENT

Plaintiffs Pharmacyclics LLC (“Pharmacyclics”) and Janssen Biotech, Inc. (“Janssen”), (collectively, “Plaintiffs”), by their undersigned attorneys, bring this action against Defendants Zydus Worldwide DMCC (“Zydus Worldwide”) and Cadila Healthcare Limited (“Cadila”) (collectively, “Zydus”), and hereby allege as follows:

NATURE OF THE ACTION

1. This action for patent infringement, brought pursuant to the patent laws of the United States, 35 U.S.C. § 1, *et seq.*, arises from Zydus’s recent submission to the United States Food and Drug Administration (“FDA”) of Abbreviated New Drug Application (“ANDA”) No. 214296 (“Zydus’s ANDA”). Zydus seeks approval to market generic versions in 140 mg, 280 mg, 420 mg, and 560 mg dosage strengths of Plaintiffs’ highly successful pharmaceutical product

IMBRUVICA[®] Tablets, prior to the expiration of United States Patent Nos. 7,514,444 (“the ’444 Patent”); 8,008,309 (“the ’309 Patent”); 8,476,284 (“the ’284 Patent”); 8,497,277 (“the ’277 Patent”); 8,697,711 (“the ’711 Patent”); 8,735,403 (“the ’403 Patent”); 8,754,090 (“the ’090 Patent”); 8,754,091 (“the ’091 Patent”); 8,952,015 (“the ’015 Patent”); 8,957,079 (“the ’079 Patent”); 9,181,257 (“the ’257 Patent”); 9,296,753 (“the ’753 Patent”); 9,725,455 (“the ’455 Patent”); 10,010,507 (“the ’507 Patent”); 10,106,548 (“the ’548 Patent”); 10,125,140 (“the ’140 Patent”); 10,213,386 (“the ’386 Patent”); 10,478,439 (“the ’439 Patent”); 10,653,696 (“the ’696 Patent”); and 10,828,259 (“the ’259 Patent”).

IMBRUVICA[®]

2. IMBRUVICA[®] (ibrutinib) is a ground-breaking drug which covalently binds to a protein called Bruton’s tyrosine kinase (“BTK”), thereby irreversibly inhibiting BTK’s activity. IMBRUVICA[®] is available in 140 mg, 280 mg, 420 mg, and 560 mg strength tablets, and 70 mg and 140 mg strength capsules.

3. BTK is a key signaling molecule in the pathway that leads to B-cell growth and maturation following activation of the B-cell receptor. Abnormalities in the B-cell receptor signaling pathway can lead to uncontrolled cell growth and cause cancers of the blood and bone marrow. IMBRUVICA[®] is the first FDA-approved BTK inhibitor.

4. Pharmacyclics invested hundreds of millions of dollars in the development of IMBRUVICA®. Pharmacyclics partnered with Janssen to bring this revolutionary drug to patients across the United States and throughout the world. Janssen, recognizing the potential of the compound, invested hundreds of millions of dollars in the clinical development and commercialization of IMBRUVICA®.

5. Initial clinical trials using IMBRUVICA® to treat mantle cell lymphoma (“MCL”) showed that patients taking IMBRUVICA® had an observed response rate of 68%. These results led FDA to grant accelerated approval to IMBRUVICA® for the treatment of MCL in patients who had received at least one prior therapy through the new Breakthrough Therapy Designation pathway, a process that allows the FDA to grant priority review to drug candidates if preliminary clinical trials indicate that the therapy may offer substantial treatment advantages over existing options for patients with serious or life-threatening diseases. IMBRUVICA® was one of the first drugs ever to receive FDA approval via the Breakthrough Therapy Designation.

6. IMBRUVICA® has received three additional Breakthrough Therapy Designations for three additional indications: Waldenström’s macroglobulinemia; chronic lymphocytic leukemia (“CLL”) or small lymphocytic lymphoma (“SLL”) with a deletion of the short arm of chromosome 17 (del 17p); and chronic graft-

versus-host-disease (“cGVHD”). IMBRUVICA[®] is also indicated for the treatment of marginal zone lymphoma (“MZL”) in patients who require systemic therapy and have received at least one prior anti-CD20-based therapy and for the treatment of CLL/SLL. For MZL and cGVHD, IMBRUVICA[®] represents the first FDA-approved treatment specifically for patients with these disorders.

7. IMBRUVICA[®] has one of the most robust clinical oncology development programs for a single molecule in the industry, with more than 150 ongoing clinical trials. There are approximately 30 ongoing company-sponsored trials, 14 of which are in Phase 3, and more than 100 investigator-sponsored trials and external collaborations that are active around the world.

8. IMBRUVICA[®] has gained widespread acceptance in the medical community with more than 200,000 patients around the world having been treated with IMBRUVICA[®]. In 2015, IMBRUVICA[®] was awarded the prestigious Prix Galien Award for Best Pharmaceutical Agent. The Prix Galien Award is considered the biomedical industry’s highest accolade.

9. The ’444, ’309, ’284, ’277, ’711, ’403, ’090, ’091, ’015, ’079, ’257, ’753, ’455, ’507, ’548, ’140, ’386, ’439, ’696, and ’259 Patents are listed in the Orange Book for IMBRUVICA[®] Tablets.

ZYDUS'S ANDA NO. 214296

57. On information and belief, Zydus has submitted ANDA No. 214296 to FDA, or caused ANDA No. 214296 to be submitted to FDA, under 21 U.S.C. § 355(j), in order to obtain approval to engage in the commercial manufacture, use, or sale of ibrutinib tablets in 140 mg, 280 mg, 420 mg, and 560 mg dosage strengths as purported generic versions of IMBRUVICA[®] Tablets prior to the expiration of the '444, '309, '284, '277, '711, '403, '090, '091, '015, '079, '257, '753, '455, '507, '548, '140, '386, '439, '696, and '259 Patents.

58. On information and belief, FDA has not approved Zydus's ANDA.

59. On information and belief, Zydus Worldwide sent Pharmacyclics a Notice Letter dated March 10, 2020 ("Notice Letter"). The Notice Letter represented that Zydus Worldwide had submitted to FDA ANDA No. 214296 and a purported Paragraph IV certification for the '444, '309, '284, '277, '711, '403, '090, '091, '015, '079, '257, '753, '455, '507, '548, '140, '386, and '439 Patents.

60. According to applicable regulations, Notice Letters such as Zydus Worldwide's must contain a detailed statement of the factual and legal basis for the applicant's opinion that the patent is invalid, unenforceable, or not infringed which includes a claim-by-claim analysis, describing "for each claim of a patent alleged not to be infringed, a full and detailed explanation of why the claim is not infringed" and "for each claim of a patent alleged to be invalid or unenforceable, a full and detailed explanation of the grounds supporting the allegation." *See* 21 CFR § 314.95(c)(7); *see also* 21 CFR § 314.52.

61. For at least one claim of each of the '444, '309, '284, '277, '711, '403, '090, '091, '015, '079, '257, and '439 Patents, Zydus Worldwide's Notice Letter failed to allege that Zydus's ANDA Products or the proposed administration of the Products would not meet the limitations of that claim.

62. On March 16, 2020 (after receipt of Zydus Worldwide's Notice Letter) and repeatedly thereafter, Plaintiffs requested that Zydus produce

100 tablets of each dosage strength of its ANDA Products. To date, Zydus has not produced any samples of its ANDA Products despite repeated requests.

63. After Plaintiffs initially brought the instant action, the '696 and '259 Patents were listed in the Orange Book for IMBRUVICA®. Pursuant to 21 CFR § 314.94(a)(12)(viii)(C)(1)(ii), Zydus must submit a certification for the '696 and '259 Patents in connection with Zydus's ANDA before obtaining FDA approval of the ANDA. On January 13, 2021, Zydus's counsel represented that Zydus intends to seek permission from FDA to market its ANDA Products prior to expiration of the '696 and '259 Patents. Plaintiffs bring this amended complaint to assert infringement of the '696 and '259 Patents in addition to the '444, '309, '284, '277, '711, '403, '090, '091, '015, '079, '257, '753, '455, '507, '548, '140, '386, and '439 Patents previously asserted against Zydus.

64. On information and belief, if FDA approves Zydus's ANDA, Zydus will manufacture, offer for sale, or sell its ANDA Products, within the United States, including within the State of Delaware, or will import its ANDA Products into the United States, including the State of Delaware. The manufacture, use, offer for sale, sale, or importation of Zydus's ANDA Products will directly infringe the '444, '309, '284, '277, '711, '403, '090, '091, '015, '079, '257, '753, '455, '507, '548, '140, '386, '439, '696, and '259 Patents and Zydus will actively induce and/or contribute to their infringement.

65. The original complaint in this action was filed within forty-five days of Plaintiffs' receipt of Zydus Worldwide's Notice Letter, pursuant to 21 U.S.C. § 355(j)(5)(B)(iii). Accordingly, Plaintiffs are entitled to a stay of FDA approval pursuant to 21 U.S.C. § 355(j)(5)(B)(iii) and U.S.C. § 355(j)(5)(F)(ii).

69. Zydus's ANDA Products infringe claims 1–8 of the '444 Patent.

70. Zydus did not contest infringement of claims 1–8 of the '444 Patent in Zydus Worldwide's Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '444 Patent, it was required by applicable regulations to state such a basis in the Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

71. Zydus has infringed claims 1–8 of the '444 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 214296 with a Paragraph IV certification

74. Zydus filed its ANDA without adequate justification for asserting that the '444 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Products. Zydus's conduct in certifying invalidity with respect to the '444 Patent renders this case “exceptional” as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

75. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '444 Patent. Plaintiffs do not have an adequate remedy at law, and considering the

balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.
